6.8 Intimate care and nappy changing

No child is excluded from participating in our setting who may, for any reason, not yet be toilet trained and who may still be wearing nappies or equivalent. We work with parents towards toilet training, unless there are medical or other developmental reasons why this may not be appropriate at the time.

We provide nappy changing facilities and exercise good hygiene practices in order to accommodate children who are not yet toilet trained.

We see toilet training as a self-care skill that children have the opportunity to learn with the full support and non-judgemental concern of adults.

Procedure

- Wherever possible, key persons undertake changing young children in their key groups; back-up key persons change them if the key person is absent.
- Young children from two years may be put into 'pull ups' as soon as they are comfortable with this and if parents agree.
- Changing areas are warm, appropriately sited and there are safe areas to lay young children if they need to have their bottoms cleaned.
- If children refuse to lie down for nappy change, they can be changed whilst standing up, providing it is still possible to clean them effectively.
- Each young child has his/her own bag to hand with their nappies/pull ups and changing wipes.
- Key persons ensure that nappy changing is relaxed and a time to promote independence in young children.
- Young children are encouraged to take an interest in using the toilet; they may just want to sit on it and talk to a friend who is also using the toilet.
- They are encouraged to wash their hands and have soap and paper towels to hand. They should be allowed time for some play as they explore the water and the soap.
- Anti-bacterial hand wash liquid or soap should not be used by young children, as they are no more effective than ordinary soap and water.
- Key persons are gentle when changing and avoid pulling faces and making negative comment about the nappy contents.
- Wipes or cotton wool and water are used to clean the child. Where cultural practices involve children being washed and dried with towels, staff aim to make reasonable adjustments to

achieve the desired results in consultation with the child's parents. Where this is not possible it is explained to parents the reasons why. The use of wipes or cotton wool and water achieves the same outcome whilst reducing the risk of cross infection from items such as towels that are not 'single use' or disposable.

- Key persons do not make inappropriate comments about young children's genitals when changing their nappies.
- Older children use the toilet when needed and are encouraged to be independent.
- Members of staff do not wipe older children's bottoms unless there is a need, or unless the child has asked.
- Key persons are responsible for changing where possible. Back-up key persons take over in the key person's absence, but where it is unavoidable that other members of staff are brought in, they must be briefed as to their responsibilities towards designated children, so that no child is inadvertently overlooked and that all children's needs continue to be met.
- Parents are encouraged to provide enough changes of clothes for 'accidents' when children are potty training or are prone to toileting 'accidents'.
- If children are left in wet or soiled nappies/pull-ups or clothing in the setting, this may constitute neglect and will be a disciplinary matter.

Nappy / clothes changing is always done in an appropriate/designated area. Children are not changed in play areas or next to snack tables. If there are limitations to change areas due to the lay-out of the room or space available this is discussed with the setting manager's line manager so that an appropriate site can be agreed that maintains the dignity of the child and good hygiene practice.
